

## ALL LED'S ARE NOT CREATED EQUAL!

See the difference in the left side verses the right side. We are a Distributor for Radiantz, Ride Time & Lazer Star Led Signals & Taillights because of the brightness and durability of the Led's. The Taillight and right signal is from a popular company in our industry. You decide, which Led product do you think puts out more light? We know that ours are so bright, the digital camera goes to fuzz mode, because it can not duplicate how bright these Led's are. The choice is yours, ours or theirs.
